National Income and Product Accounts

Tables 8.4 and 8.5 in the "National Income and Product Accounts" section of the December 1999 SURVEY OF CURRENT BUSINESS contained errors. In table 8.4, the estimates for the component contributions to the percent change in real private fixed investment for the first and second quarters of 1999 were incorrect. The correct estimates are provided in NIPA table 8.4 on page D-27 of the "Selected NIPA Tables" in this issue.

In table 8.5, the estimates for the component contributions to the percent change in imports for all periods were incorrect (those for exports were correct). The table with the corrected estimates is provided below.

1. Exports and imports of certain goods, primarily military equipment purchased and sold by the Federal Government, are included in services. Beginning with 1986, repairs and alterations of equipment were reclassified from goods to services.

NOTE.—The quantity indexes on which the estimates in this table are based are shown in table 7.10. The esti-

mates in this table differ from those in table 8.2 because this table shows contributions to real exports and to real imports, whereas table 8.2 shows contributions to real gross domestic product. Because imports are subtracted in the calculation of gross domestic product, the contributions of components of real imports have opposite signs in this table and in table 8.2.
